MEMORANDUM FOR: Chief, Physical Security Division os

STATINTL

FROM:

Chief, Breat Estate Sha Construction

Division, OL

SUBJECT:

Project SAFE Site Survey

REFERENCE:

Memo dtd. 14 Oct 77 to C/LSD/OL fm C/PhySP/OS.

Subject: Special Purpose Vault GE22-CE78

- 1. The referent addresses the physical security survey made of the proposed Project SAFE computer center. It is requested that this memorandum be reviewed with specific regard to any necessary modifications to the numerous windows along the external wall due to physical or technical security requirements. The mirror image, GC03 center has had the windows plated and covered. As the SAFE Architect-Engineer is currently working on the preliminary architectural design, it is requested that an evaluation be made as soon as possible to determine the impact of any special requirements on this design.
- In the conceptual design, several windows are used to house exhaust fans to vent smoke or halon discharged from the underfloor systems. The alternate design would require installation of exhaust fans on the first floor roof which would be ducted through the first floor office space. The intent was to avoid introducing smoke into major building exhaust systems which might contaminate other areas of the building.
